

This is a Windows flashing script for Sony Xperia X device.

Power on the device in fastboot mode, by doing the following:

1. Turn off your Xperia.
2. Connect one end of a USB cable to your PC.
3. While holding the volume up button pressed, connect the other end of the USB cable to your Xperia.
4. After this you should see the blue LED lit on Xperia, and it will be ready for flashing

Press any key to continue . . .
